Your guide to real estate in coastal Orange County, California

## Newport Beach, CA

This week the median list price for Newport Beach, CA is \$5,495,000 with the market action index hovering around 34. This is less than last month's market action index of 35. Inventory has increased to 98.

## MARKET ACTION INDEX

This answers "How's the Market?" by comparing rate of sales versus inventory.

## Slight Seller's Advantage

The market has been cooling over time and prices plateaued for a while. Despite the consistent decrease in MAI, we're in the Seller's zone. Watch for changes in MAI. If the MAI resumes its climb, prices will likely follow suit. If the MAI drops consistently or falls into the Buyer's zone, watch for downward pressure on prices.

## REAL-TIME MARKET PROFILE

Median List Price		\$5,495,000
Median Price of New Listings		\$4,475,000
Per Square Foot		\$1,805
Average Days on Market		111

## Slight Seller's Advantage

## MARKET SEGMENTS

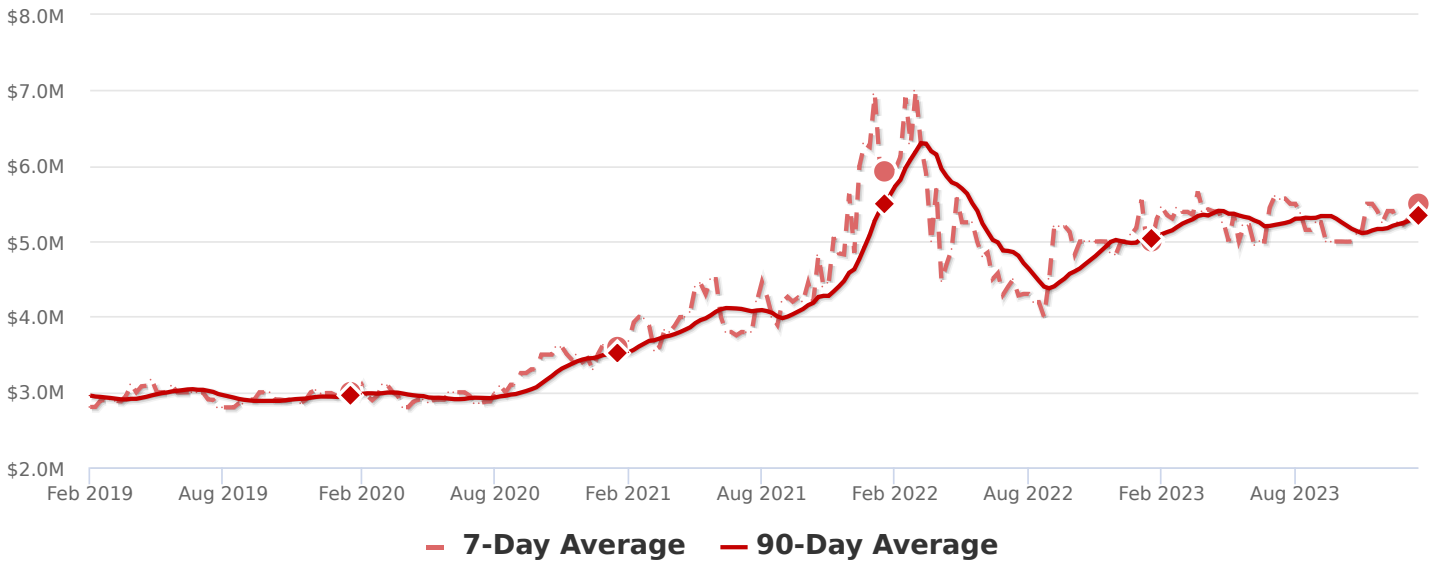

Each segment below represents approximately 25% of the market ordered by price.

Median Price	Sq. Ft.	Lot Size	Beds	Bath	Age	New	Absorbed	DOM
\$10,995,000	5,315	6,500 - 8,000 sqft	5	6	20	0	1	73
\$6,495,000	3,119	4,500 - 6,500 sqft	4	4.5	35	3	1	84
\$4,800,000	2,696	0 - 4,500 sqft	4	4	27	3	1	119
\$2,595,000	1,816	0 - 4,500 sqft	3	2.5	58	4	4	56

## Newport Beach, CA

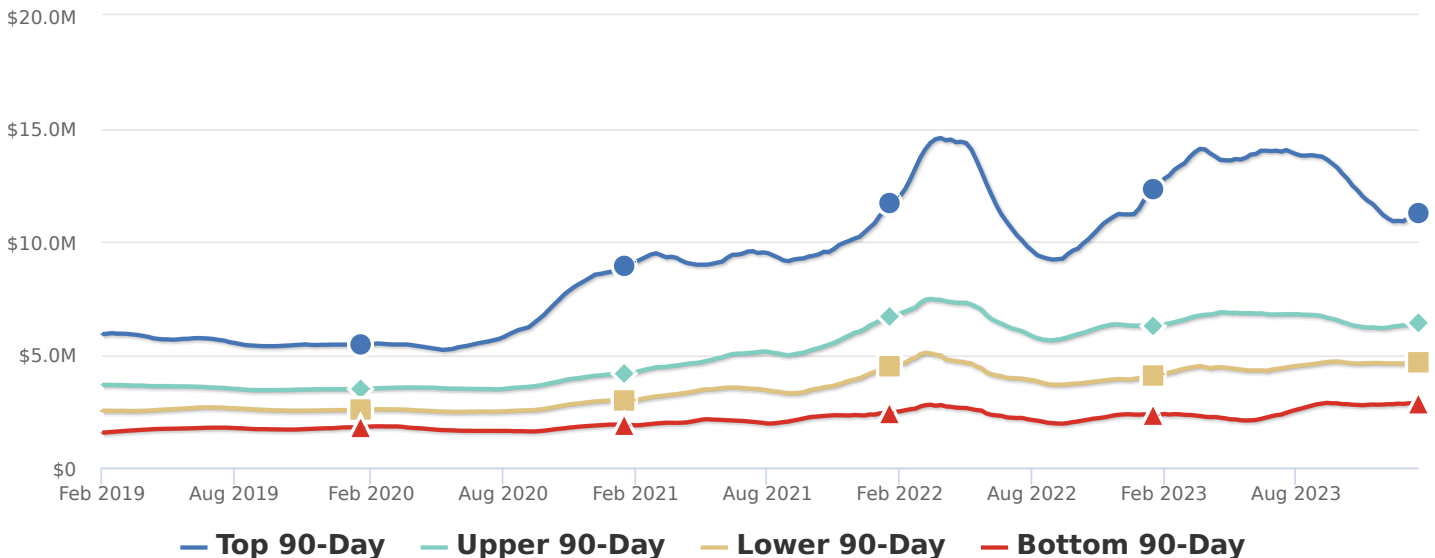

## MEDIAN LIST PRICE

The market seems to have paused around this plateau. The Market Action Index is a good leading indicator for the durability of this trend.

## SEGMENTS

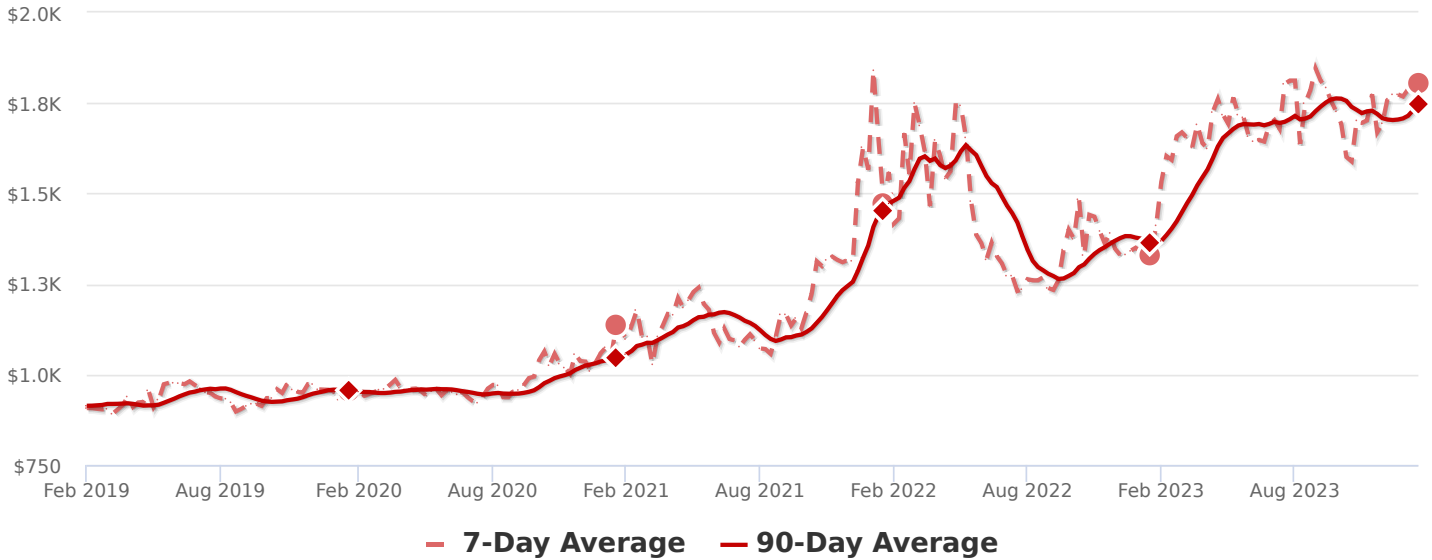

Prices have settled at a price plateau across the board. Prices in all four quartiles are basically mixed. Look for a persistent shift (up or down) in the Market Action Index before prices move from these current levels.

## Newport Beach, CA

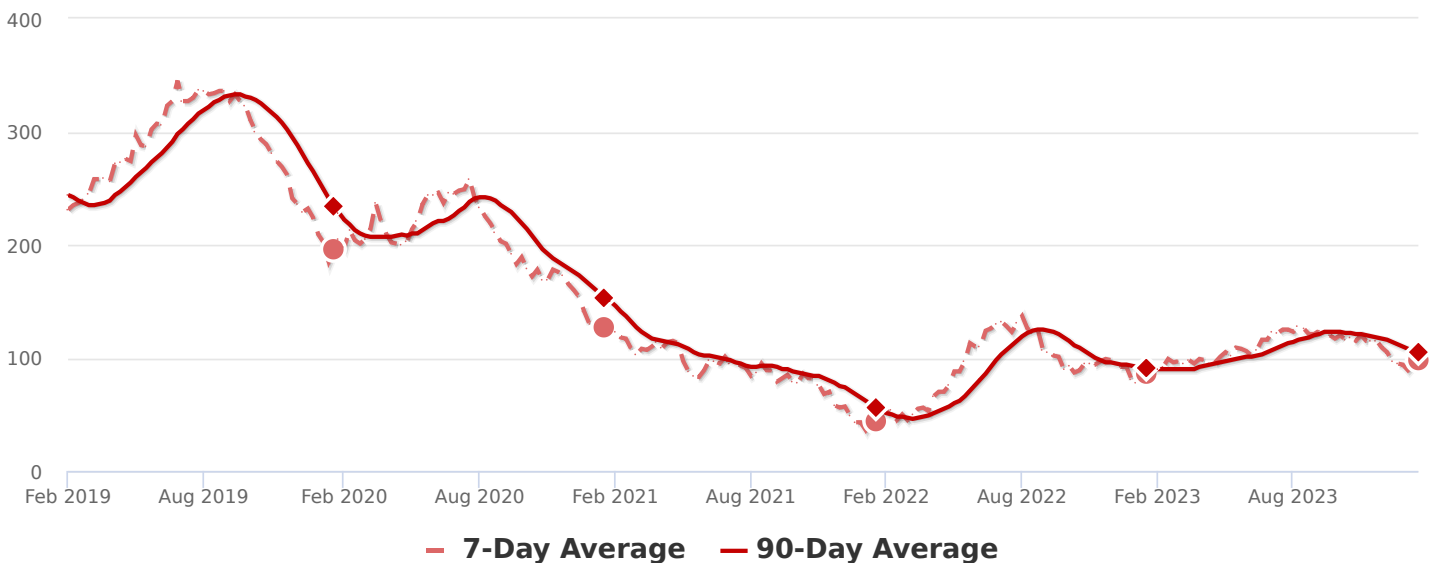

## PRICE PER SQUARE FOOT

The value placed on homes appears to be on the upswing, despite the fact that prices in general have remained basically flat. These conditions can arise when inventory is light and more, smaller homes have more influence on overall prices.

## INVENTORY

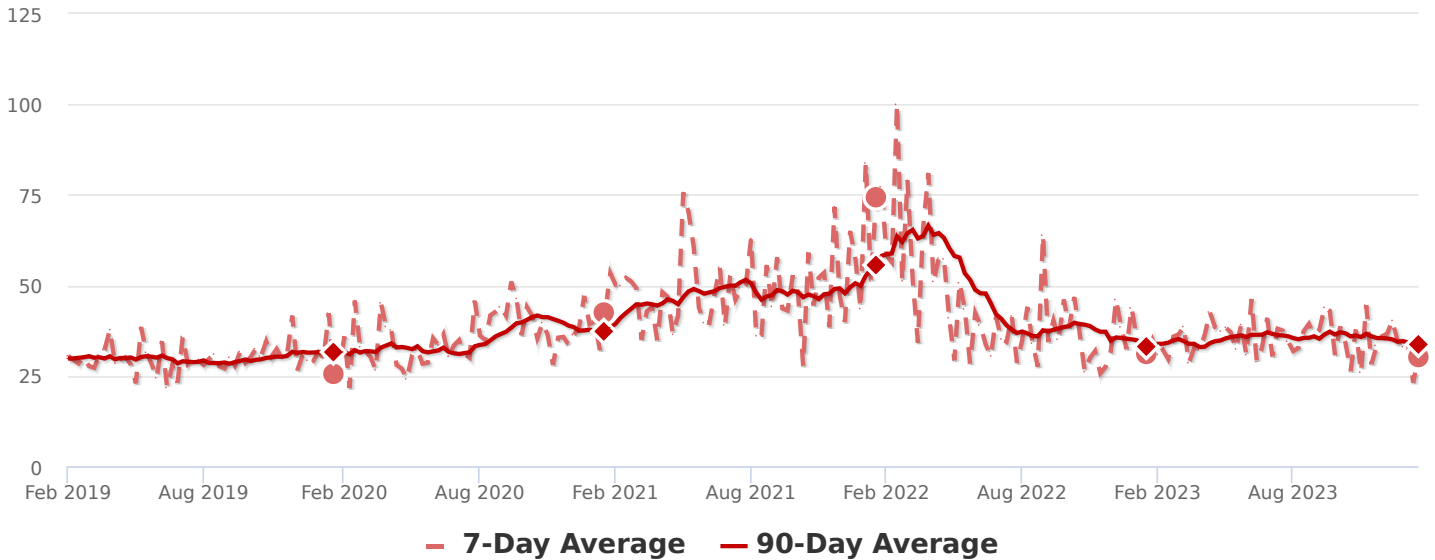

Inventory has been falling in recent weeks. Note that declining inventory alone does not signal a strengthening market. Look to the Market Action Index and Days on Market trends to gauge whether buyer interest is changing with the available supply.

## Newport Beach, CA

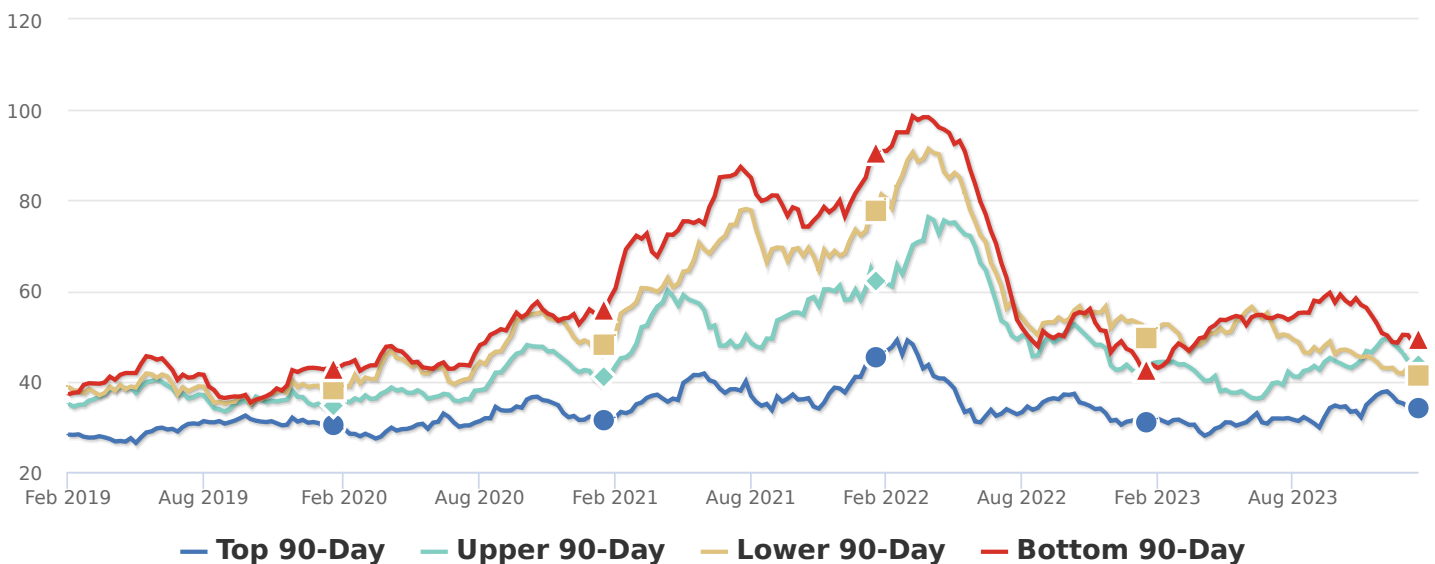

## MARKET ACTION INDEX

The market has been cooling over time and prices plateaued for a while. Despite the consistent decrease in MAI, we're in the Seller's zone. Watch for changes in MAI. If the MAI resumes its climb, prices will likely follow suit. If the MAI drops consistently or falls into the Buyer's zone, watch for downward pressure on prices.

## MARKET ACTION SEGMENTS

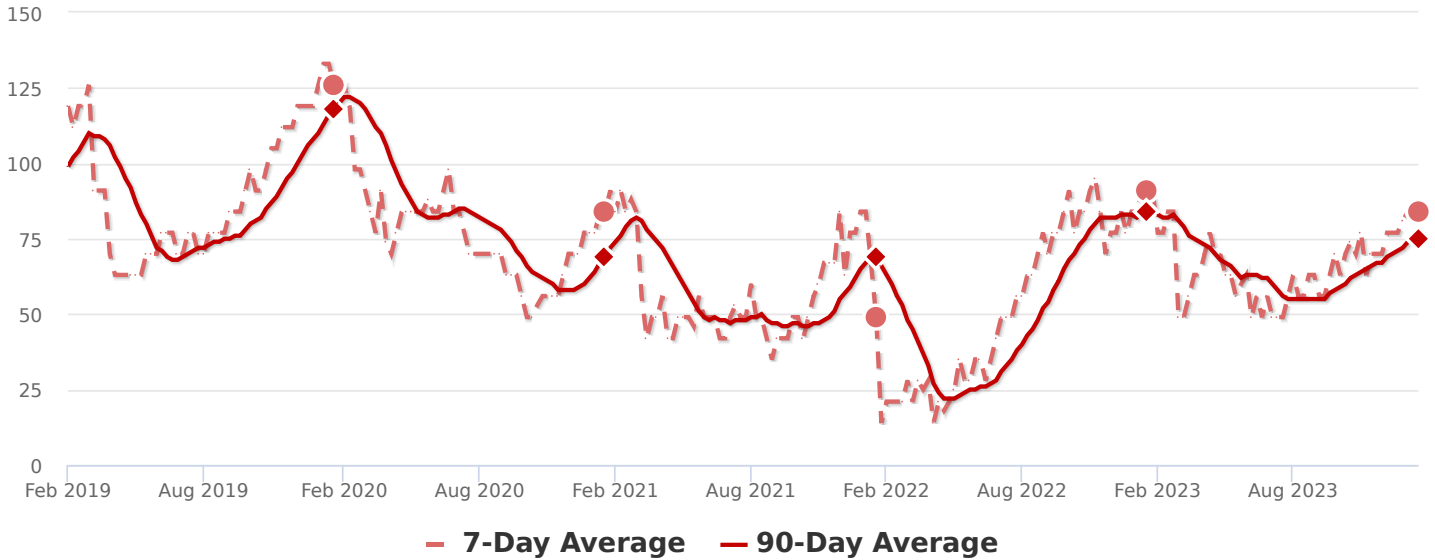

Not surprisingly, all segments in the market are showing high levels of demand. Watch the quartiles for changes before the whole market changes. Often one end of the market (e.g. the high-end) will weaken before the rest of the market and signal a slowdown for the whole group.

# Newport Beach, CA

## MEDIAN DAYS ON MARKET (DOM)

The properties have been on the market for an average of 111 days. Half of the listings have come newly on the market in the past 75 or so days. Watch the 90-day DOM trend for signals of a changing market.

## SEGMENTS

It is not uncommon for the higher priced homes in an area to take longer to sell than those in the lower quartiles.
