This answers "How's the Market?" by comparing rate of sales versus inventory.

Slight Seller's Advantage

The market has been cooling over time and prices plateaued for a while. Despite the consistent decrease in MAI, we're in the Seller's zone. Watch for changes in MAI. If the MAI resumes its climb, prices will likely follow suit. If the MAI drops consistently or falls into the Buyer's zone, watch for downward pressure on prices.

Prices in this zip code seem to have settled around a plateau. Look for a persistent down-shift in the Market Action Index before we see prices deviate from these levels.

**SEGMENTS**

In the quartile market segments, we see most of the market for this zip code showing price weakness lately. Notice however, that Quartile 4 at the low-end of the market is still on an up-trend. Often this condition happens in markets where demand has fallen (for example, due to micro-location variables) but supply is still relatively short. Buyers are focusing on the lowest price homes in the area.

PRICE PER SQUARE FOOT

The value placed on homes continues to increase, despite the fact that prices in general have remained basically flat. These conditions can arise when inventory is light and more, smaller homes have more influence on overall prices.

INVENTORY

Inventory has been climbing lately. Note that rising inventory alone does not signal a weakening market. Look to the Market Action Index and Days on Market trends to gauge whether buyer interest is keeping up with available supply.
